SECUMAX OPTICUT

NO. 436

Original size

4-times usable blade

Before you need to change your blade, you have the option of rotating it multiple times. Four times to be precise. In this way, you can get so much more out of your blade. Practical for you, favourable for your company!

Work ergonomically

It's easy to work ergonomically with the SECUMAX OPTICUT. Your fingers will be delighted with the sizable grip, your thumb with the additional curving at the front of the handle. Glide cutting couldn't be more comfortable.

Cut clean

Whether cutting foam or film, the bendable plastic material-guide reliably stops material jamming in front of the blade. The same guide simultaneously protects your fingers from blade contact.

Extremely robust

The glide foot, made of Teflon-coated metal, is both durable and robust. The foot and the similarly robust handle are firmly screwed together; you will be sure to enjoy your cutting tool for an extended period of time.

Easy blade change

Blade change is performed using the small, rotating bracket found on the cutter side. Swing, press and release the guide foot. The blade is housed within the foot. Replace or rotate the blade before pushing everything back into place.

Glides over the material. And right through the middle. For „pull“ cutting.

You are looking for a film and foam cutter that effortlessly cuts harder and stronger film? One that's not afraid of stubborn foam? You have found the best possible solution with the SECUMAX OPTICUT. Its Teflon-coated, metal foot makes it both extremely abrasion resistant and easy to slide. Glide with jam less ease through whatever material you want to cut. Ideal for „pull“ cutting.

PRODUCT FEATURES

Technical features

	Maximum safety		Tool-less blade change
	Very abrasion resistant		Very ergonomic
	4-times usable blade		Cutting depth
	For right and left hander		Printable for promotional purposes
