# SECUNORM 300

NO. 30000110

Original size

#### Ergonomic handle

The excellent ergonomics can be felt all over the SECUNORM 300, for example in the newly shaped handle which fits comfortably into the hand. Or in details such as the nicely rounded knife end or the non-slip soft grip on the slider.

#### Pleasantly light

Like its predecessor, the SECUNORM 300 also impresses with its lightness. For just 52 grams you get a comfortable and versatile professional cutting tool.

#### Abrasion resistant

The SECUNORM 300 is made of a glass fibre reinforced plastic, making it particularly abrasion resistant. Your safety knife therefore stays in top form even when in heavy contact with the cutting material.

#### Increased cutting depth

The increased cutting depth further expands the range of applications. Even frequent cutting is easy – another benefit of the new design with its outstanding ergonomics.

#### Optimal blade changing

Just pressing the blade change button allows you to remove the plastic insert with the blade. The click-in blade cover and integrated magnet make blade changing even easier and safer.

**Surprisingly light. Convincingly good.**

**With rounded-tip trapezoid blade.**

The SECUNORM 300 is the SECUNORM 500's "little brother" and a further development of the SECUNORM PROFI LIGHT. It retains a pleasant lightness as well as the proven automatic blade retraction. You'll discover much more in the optimised SECUNORM 300 all-rounder. For example, the especially ergonomic design, an increased cutting depth, the new soft grip, and extremely user-friendly blade changing.

**PRODUCT FEATURES**

**Technical features**

	<b>NO. 56</b> 0.63 mm
	<b>NO. 5634</b> 0.63 mm, rounded blade tips

**Certificates and awards**

**Application**

**Safety technology**

**Automatic blade retraction – a high degree of safety**

The automatic blade retraction of the SECUNORM 300 guarantees a high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. Then the blade will retract into the handle immediately after leaving the material being cut.

# YOU CAN FEEL THE QUALITY.
